

Dimensions+

Product overview

Consolidate your business intelligence into one single view. Dimensions+ is Zonal's suite of additional reporting tools, enabling you to combine various data sources, such as accounting, payroll, and customer feedback, within one platform to create bespoke views and dashboards. Requires a Power BI Pro license.

Power BI integrated

Bring your data to life and keep your team informed with Microsoft Power BI integrated dashboards and reports, and schedulable emails including set dashboards.

Insights from day one

Dimensions+ can pull through historical data, offering meaningful insights and trend analysis from day one.

Combine your data

Aggregate different data sources such as accounting systems, payroll, and customer feedback into one system, and save time by eliminating the need to log in and out of multiple systems to pull reports.

Supported by Zonal

Unlike some other reporting providers, Dimensions+ is supported by Zonal's dedicated UK-based help centre.

Accessible anywhere

Dimensions+ can be accessed on PC, tablet, mobile, or via a free Power BI application.

Dimensions+ is extremely intuitive and mines data quickly, so that we have more time to focus on our business. The old adage 'a picture speaks a thousand words' relates to Dimensions+ as it does the same thing for spreadsheets, transforming data into a graphic, which is great to share with employees. It's a game changer!"
