

Integrated Payments

77%

of consumers find having to wait to receive and settle the bill frustrating during their visits to pubs, bars and restaurants.

GO Technology: Fixing people's hospitality bugbears

Product overview

With customers demanding faster service – and in particular a quicker finish to their meal – payment has become a crucial part of the customer journey. Zonal's card payment system (ZCPS) allows you to take payments at the table and any point-of-sale. It simplifies the payment process, quickly and efficiently enabling you to turn tables faster, streamline your processes, reduce operating costs, and maximise your revenue potential.

Quick and secure

Zonal's integrated payment system is fully PCI-compliant, giving you peace of mind about data security while allowing you to process guests' payments quickly.

Digital payments supported

As well as processing card payments, digital wallets such as Google Pay and Apple Pay are supported.

EPoS integration

Full integration with Zonal's EPoS allows staff to pick up an account for payment without having to return to a terminal. This eliminates the need for staff to re-enter payment amounts, reducing mistakes and speeding up service. Once a balance has been paid in full, the EPoS account will be closed off automatically.

Audit tracking

Includes a detailed audit system that verifies all transactions.

Split the bill

Guests are able to make a part payment should they choose to pay individually.

Why Zonal

Zonal is the UK's no.1 hospitality tech provider, serving over 17,000 businesses to enhance efficiency, manage costs, and increase revenue. Our seamlessly connected tech ecosystem provides our customers with unparalleled operational control and insight, while over 200 integration partners give customers the flexibility to create their ideal tech stack.

Begin your Zonal journey.
