

Acquire Purchase to Pay

Overview

Acquire is a core component within Zonal's suite of Stock and Order solutions and can be purchased as a bolt-on to Zonal's standard EPoS Stock and Order module. It's an intuitive, end-to-end online purchasing management solution - ideal for companies with multi-site estates.

Acquire enables your staff to see what's in stock, what's on order and when orders are due for delivery. It reduces wastage by eliminating over-ordering and it improves margins significantly by sourcing goods in the best quantities from the best supplier at the best price.

Visibility of stock on hand, stock on order and minimum stock levels at the point of order provide operators with all the accurate, real-time information they need to optimise stock levels - reducing out-of-stocks and avoiding excessive stockholding.

Full integration with Zonal's EPoS system means that you will only ever display exactly what's available to sell, with one version of the truth shared across all your sites.

Features

- » Real-time integration with Zonal's EPoS system allows you to see live stock levels as sales are processed and goods are received
- » Web-based, mobile-optimised application
- » Minimum stock level setting
- » Create and clone site and central order templates that are supplier agnostic
- » Automated invoice reconciliation and finance system integration
- » Easy to manage and control product lists, pricing and preferred suppliers
- » Catalogue management ensures your sites always have the right buying list
- » All major suppliers supported with no ongoing supplier fees

Acquire has given us full visibility over our entire stock management process. It's brilliant our suppliers have been able to integrate with the platform, meaning our sites and Head Office have visibility and control of the real-time order process.
