

Dimensions Publisher

Overview

Effortlessly distribute your reports to everyone in your team with Dimensions Publisher.

Data is only valuable when it's put in the right format and delivered to the right people. Which is why how and when you publish your reports is as important as the data itself. Dimensions Publisher is an intuitive tool that puts you in charge of the distribution list for every report you produce, ensuring you deliver the right data to the right people in the right format.

Features

- » An add-on product to Zonal's standard EPoS reporting module - Dimensions
- » Control the precise day and time when reports are published
- » Control exactly who reports are distributed to
- » Set up and manage distribution lists
- » Publish custom and standard reports as desired
- » Create a log of all published reports
- » Easy to maintain and update settings
- » Available for a one-off fee plus maintenance costs

The level of detailed data we are able to access through Zonal EPoS is second to none. We have been able to drill down and identify everything from mistakes being made by staff, that when added up are costing the business, to the success (or not) of promotions.”
