

## Mobile Stocks

### Overview

Zonal's Mobile Stocks application significantly simplifies your stock taking process by enabling stock counting from a mobile device, making it easier, more efficient and accurate.

Tightly integrated with Zonal's Stock EPoS module and full Stock and Order solution suite, users can eliminate the need for manual count entries and printed count sheets and easily facilitate counting by location at site level.

Unlike alternative stock solutions, Mobile Stocks retrieves product information from your head office as well as the location data from your Site PC. Upon selecting a location, products are displayed in the exact order they appear in, enabling you to submit a count and load the next product with a single click.

### Features

- » Available on Android or iOS
- » Flexible and powerful application
- » Combines counts from multiple locations
- » Counts can be completed by multiple stocktakers
- » Counts are imported directly into Zonal's EPoS Stock module
- » Easy to find products by name, supplier product reference number, barcode or EPoS entity code
- » Only requires Wi-Fi during initiation

**10%** of food purchased by food service operators is trashed before reaching the plate

Previously we had to use an external provider to manage our wet stock and gathering the necessary data from the EPoS was nigh on impossible. Thankfully those frustrations are behind us and the process has been transformed so we can control our stock levels at each site far more efficiently.

Joe Cussens  
Managing Director, Bath Pub Company

THE BATH PUB COMPANY

**With an accurate view of stock and wastage, we are now building an action plan to improve gross profit across the estate.**

Adam Mayers  
Finance Director, Hydes Brewery

**HYDES** 1863

## Benefits

Efficient stock counting through a mobile device

Simplifies the stocktaking process

Easy-to-use and highly flexible
